

## **ISTANBUL BEYKENT UNIVERSITY**

### **ENERGY MANAGEMENT SYSTEM (EnMS) POLICY**

In alignment with its mission, vision, and core values, Istanbul Beykent University aims to continuously improve energy performance, reduce costs, enhance energy efficiency, minimize environmental impacts and greenhouse gas emissions, and conserve natural resources through the establishment and operation of its Energy Management System.

The goals shaped by the Energy Management System Policy adopted by Istanbul Beykent University are as follows:

- 1.** Reducing energy consumption and continuously improving energy efficiency,
- 2.** Complying with all laws and regulations related to energy management and fulfilling their requirements,
- 3.** Enhancing energy efficiency and performance values in all processes,
- 4.** Utilizing appropriate resources and technologies to effectively control energy,
- 5.** Setting targets aligned with the energy policy, taking actions to achieve these targets, and providing the necessary resources, as determined by the University Management,
- 6.** Raising awareness about energy management among academic and administrative staff as well as students, and informing the local community.

Evaluations are conducted to monitor the achievement of these goals, and corrective and continuous improvement measures are taken when necessary.
