

## **SMOKE-FREE CAMPUS COMMITMENT**

Istanbul Beykent University supports a smoke-free environment within the framework of the Smoke-Free Campus Commitment to promote a healthy lifestyle and protect the environment. Committed to adopting a sensitive approach to tobacco and tobacco product consumption, it pledges to prioritize the health and well-being of students, faculty, staff, and visitors.

In alignment with the Istanbul Beykent University Smoke-Free Air Commitment, the following principles are adhered to:

- 1.** The use of tobacco and tobacco products is prohibited in all enclosed areas, including university campuses, buildings, and facilities. Administrative fines are applied under the Laws No. 4207 and 4733 to prevent the use of tobacco products by all stakeholders.
- 2.** Smoking and the use of tobacco products are prohibited in all enclosed campus areas, including student dormitories, indoor sports facilities, and campus transportation vehicles.
- 3.** The sale of tobacco and tobacco related products is prohibited on our campuses.
- 4.** This commitment is established to positively impact individuals' health, protect the environment, prevent passive smoking, and create a sustainable living space. Compliance with this commitment is expected from all university staff and students.

To support this commitment and assist in combating smoking addiction, free counseling services are available.
